

DIGNITY IN ACTION

MSF has a legacy of taking principled medical humanitarian action and speaking out.

BUT humanitarian aid also has a colonial legacy that preserves the supremacy of whiteness and its privileges.

As MSF'ers, **WE ACKNOWLEDGE** our complicity in maintaining the inequities that stem from it.

We are taking action to change.

The journey begins by understanding how **STRUCTURAL RACISM** impacts our work.

We are **RETHINKING** how we do medical humanitarianism that incorporates the knowledge of local colleagues.

Connect to conversations, mentoring and e-learning spaces to be part of the change.
